

LGR-ICOS Technology

OA-ICOS (Off-Axis Integrated Cavity Output Spectroscopy)

LGR-ICOS Technology

Best overall performance with low cost of ownership

Speed

Fastest measurement
Fast flow applications
Monitor at up to 20Hz

Wide dynamic range

Accurate in typical conditions
Accurate in unexpected conditions
Still reporting far outside the linear range
Measure everything

Precision

Down to the ppt
Track the smallest changes

Reliability

Stability (no drift)
No recalibration
Trust
No interruptions
No extra cost

Accuracy

More datapoints = more information
Smart algorithms
No cross-interferences

Focus on your application

Rugged = insensitive to external conditions
Longer maintenance intervals
Field serviceable
No interruptions
No extra cost
